DESIGN & DELIVERY DOCUMENT · v1.0.0

LeadGen *AI*

An open-source B2B platform for lead generation, email verification, and deliverability scoring.

Built for *closing*

What this document covers

This handover explains how LeadGen AI looks and why. It covers the brand, color, type, icons, components, wireframes, finished screens, motion, and architecture, plus where every source file lives.

GOAL

Build a lead-generation product that reads as a serious B2B tool, alongside a landing page that shows portfolio-level craft.

AUDIENCES

Buyer	evaluates it as a lead-generation solution
User	signs in and manages leads
Developer	maintains and extends the code
Reviewer	assesses quality and craft

03 Design principles
04 Brand identity
05 Color: landing brand
06 Color: application UI
07 Typography

09 Components & states
10 Wireframes: auth & generate
11 Wireframes: manage & verify
12 High-fidelity screens
13 Mobile & prototype flow
14 Motion system
15 System architecture
16 Stack & quality
17 Handover checklist

Design principles

Clear over clever

Product screens favour plain labels and obvious actions. Expressive flourishes stay on the landing page.

Smooth, purposeful motion

The landing page moves with measured easing. Nothing animates without a reason.

Dense but readable

The app puts lots of data on screen while keeping hierarchy and spacing easy to scan.

Trustworthy copy

No inflated or unsupported claims. Every number shown is one the product can back up.

Dark-first, warm accents

Near-black surfaces with crimson and gold accents. A matching light theme is included.

Accessible by default

Visible focus, strong contrast, keyboard access, and respect for reduced-motion settings.

Brand identity

LeadGen *AI*

FIND · VERIFY · DELIVER

ON DARK

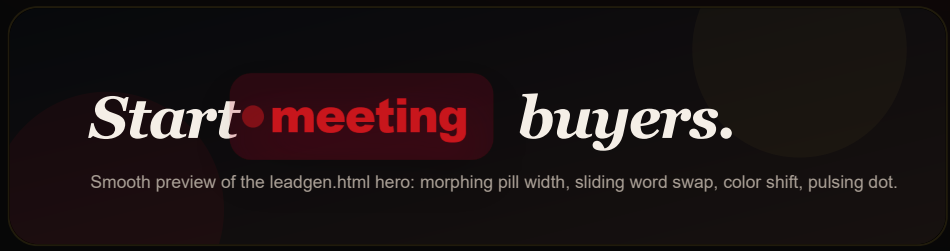

ON LIGHT

MONO

VOICE

Confident, specific, and quiet. Short sentences. Talk about outcomes (meetings booked, deals signed) instead of adjectives.

SIGNATURE ELEMENT: THE ROTATING WORD PILL

The hero headline cycles **meeting** → **booking** → **closing** → **winning** → **signing**. Each word has its own accent color, and the pill resizes smoothly to fit the next word.

- *meeting*
- *booking*
- *closing*
- *winning*
- *signing*

Color system: landing brand

#000000

Ink

`--bg`

Page background

#0A0A0A

Ink raised

`--bg-3 / --code-bg`

Panels, code blocks

Bone

`--tx`

Primary text

#C8141E

Crimson

`--accent`

Primary accent, CTAs, "meeting"

#EF4444

Signal red

`accent.red`

"booking", error states

#C9A84C

Gold

`accent.gold`

Hairlines, marks, "closing"

#AE1D37

Wine

`accent.wine`

"winning"

#8A6E2F

Olive

`accent.olive`

"signing"

BRAND GRADIENT

`linear-gradient(110deg, #C8141E 0%, #EF4444 50%, #C9A84C 100%)`

LIGHT THEME COUNTERPARTS

#F8F5EF
bg

#F1EDE6
bg-2

#EBE4D9
bg-3

#FFFDF8
panel

Translucency tokens: text-2 = bone at 68%, text-3 = bone at 42%, line = gold at 14%, strong line = gold at 28%.

Color system: application UI

The signed-in app uses a calmer, data-friendly palette defined in `tailwind.config.js`. Teal is for actions, slate for structure, amber for highlights and warnings, green for success.

	50	100	200	300	400	500	600	700	800	900	950
Primary · Teal Buttons, links, active tabs	#eefcf8	#d5f6ee	#afece0	#7bdccc	#42c5b4	#0f9f91	#087f74	#07675f	#07524d	#064541	#022a28
Secondary · Slate Surfaces, borders, body text	#f8fafc	#f1f5f9	#e2e8f0	#cbd5e1	#94a3b8	#64748b	#475569	#334155	#1e293b	#0f172a	#020617
Accent / Warning · Amber Badges, highlights, warnings	#fffbeb	#fef3c7	#fde68a	#f7d15a	#e8b83a	#b98221	#986617	#7a4d15	#653f17	#573617	#321c09
Success · Green Verified emails, passing checks	#f0fdf4	#dcfce7	#bbf7d0	#86efac	#4ade80	#22c55e	#16a34a	#15803d	#166534	#14532d	#052e16

Contrast: primary-600 on white and primary-500 with white text both meet WCAG AA for UI text and components. Keep amber text at 600 or darker on light surfaces.

Typography

DISPLAY
Cormorant Garamond
300 · 400 · 600 · 700, italics
Landing headlines

Turn strangers into *signed* deals.

SANS, LANDING
DM Sans
300 – 700
Landing body & UI

Discover high-intent prospects, verify every email, and land in the inbox.

SANS, APP
Inter
400 – 700
App labels & controls

Leads Hub · 1,284 prospects · **Export CSV**

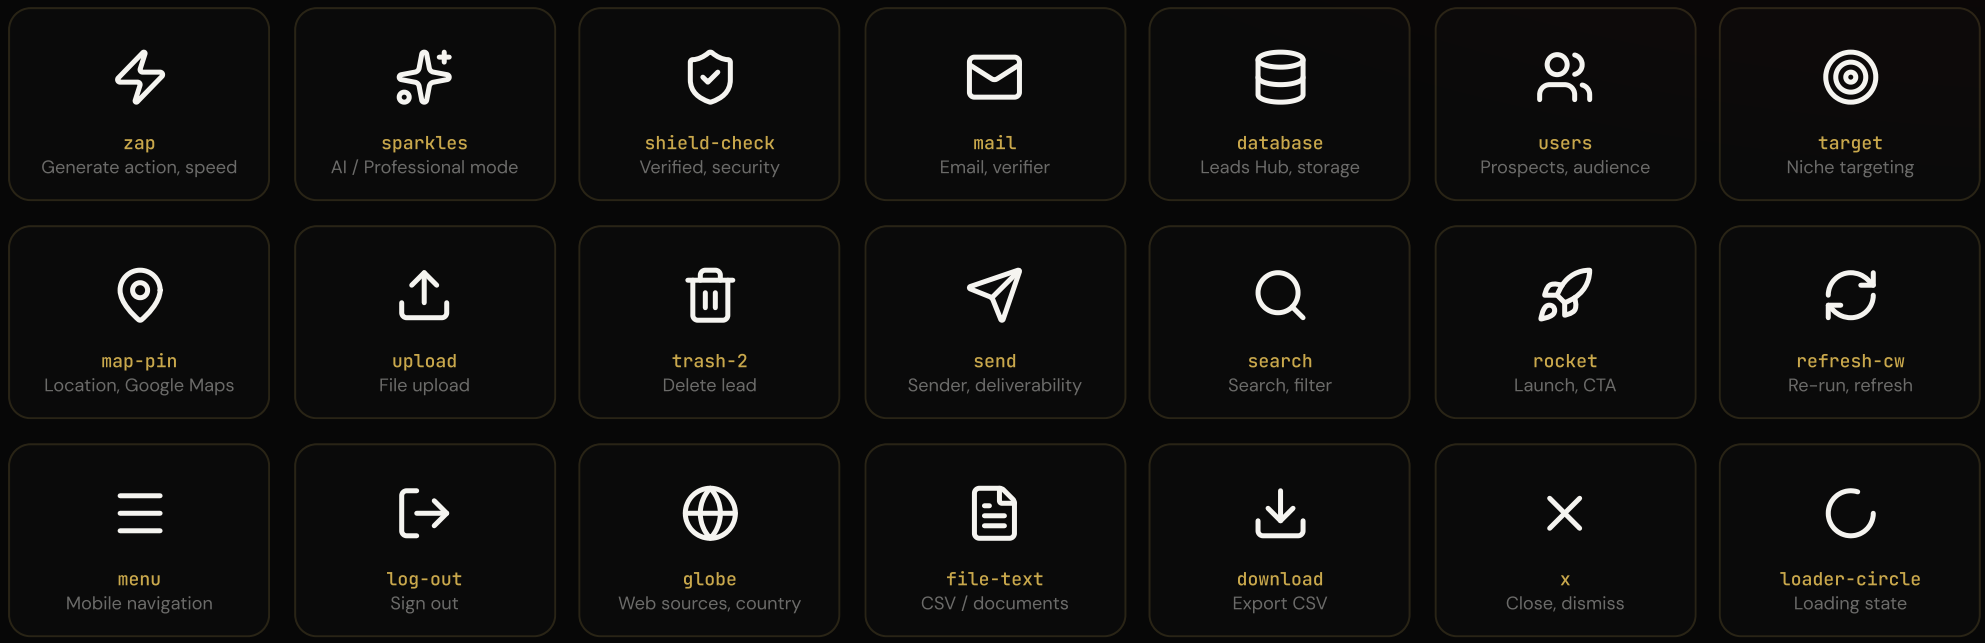

MONO
JetBrains Mono
400 · 500
Code, tokens, data

```
POST /api/generate/ → 201 Created
```

ROLE	SIZE / LINE	WEIGHT	FONT
Hero H1	64–88 / 1.0	400 italic accent	Cormorant Garamond
Section H2	40 / 1.1	600	Cormorant Garamond
Card title	18 / 1.3	600	DM Sans / Inter
Body	15–16 / 1.6	400	DM Sans / Inter
Label / eyebrow	11–12 / 1.2, +0.14em	500 uppercase	JetBrains Mono

Icon set (vector)

All icons come from **Lucide** (`lucide-react`, ISC license). These are the exact vectors used in the product. Spec: 24 × 24 grid, 2 px stroke, round caps and joins, no fill, inherits text color.

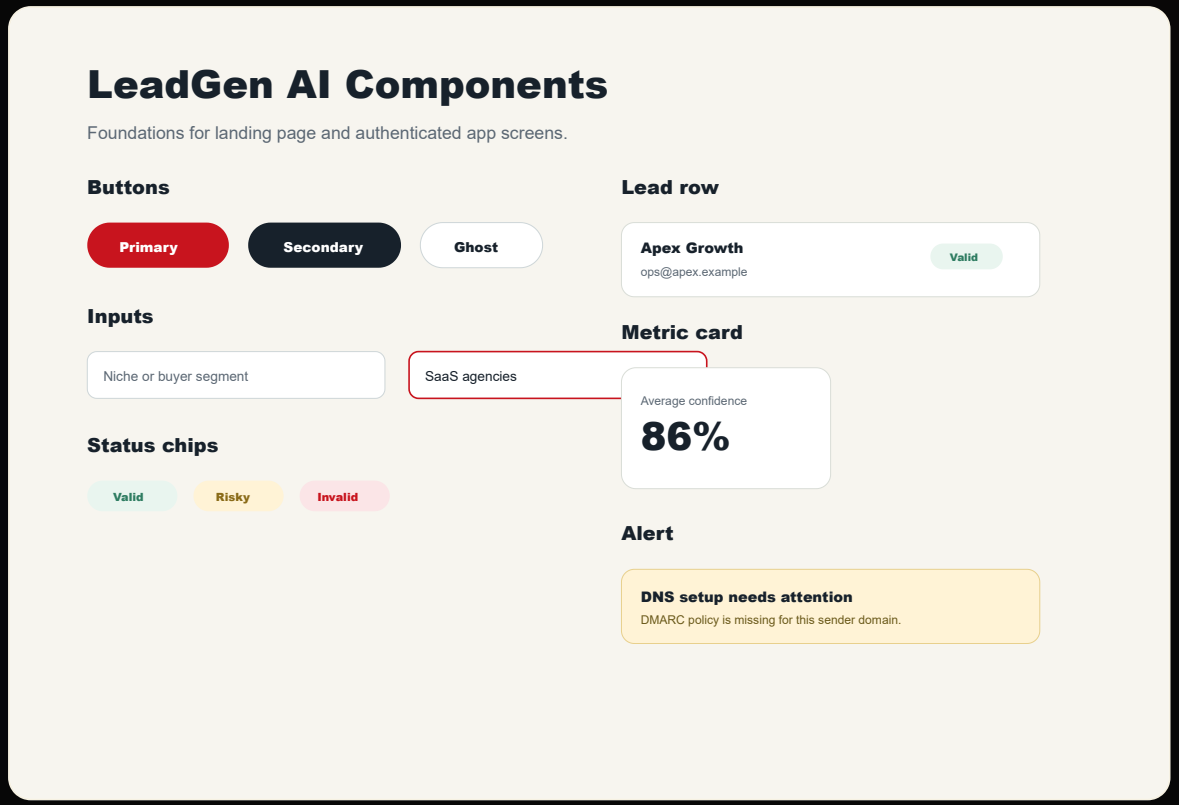

SIZES IN USE

COLORS

Components & states

Component board: buttons, inputs, chips, badges, table rows, score ring

LANDING

- Hero word pill
- Live status pill
- Primary CTA
- Secondary CTA
- Scroll hint
- Feature card
- Demo lead card
- Modal
- Error banner

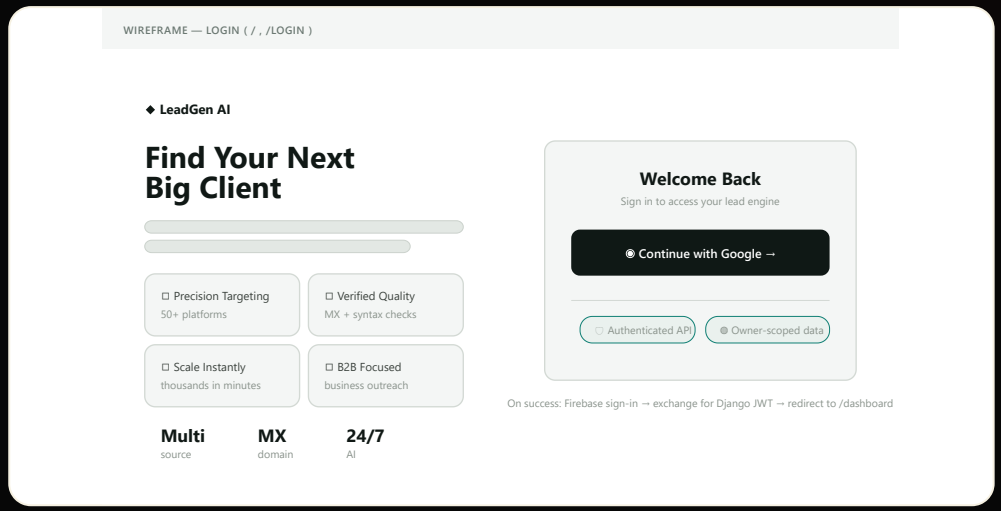

APPLICATION

- Sidebar
- Mobile topbar
- Status chip
- Tab item
- Stat row
- Input
- Select
- Toggle
- Platform chip
- Buttons ×3
- Badge
- Table row
- Empty state
- Score ring
- Recommendations

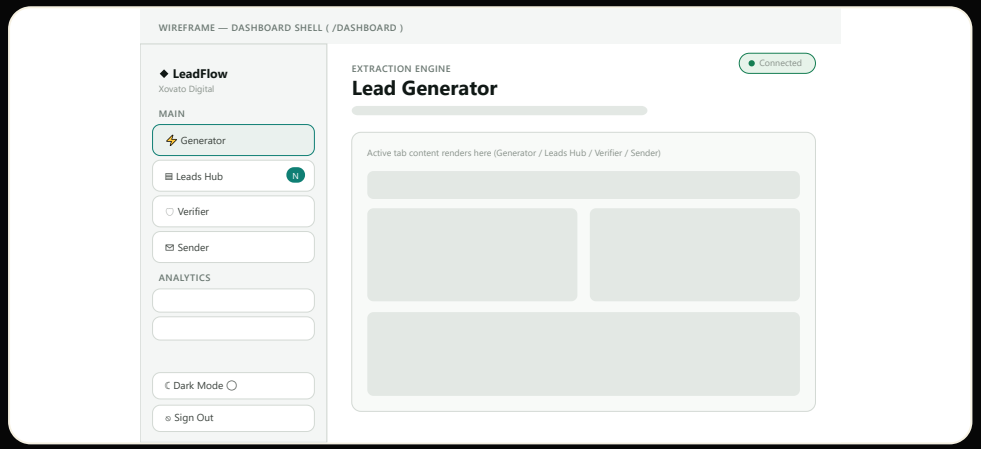

REQUIRED STATES

- Default
- Hover
- Active
- Focused
- Disabled
- Loading
- Empty
- Error
- Warning
- Success

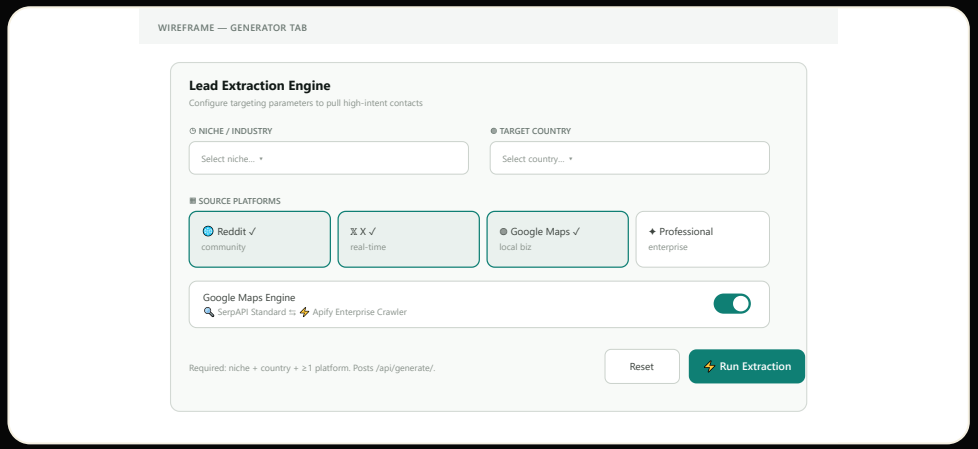

Wireframes: sign-in, dashboard, generator

Login · Google sign-in exchanged for a Django JWT

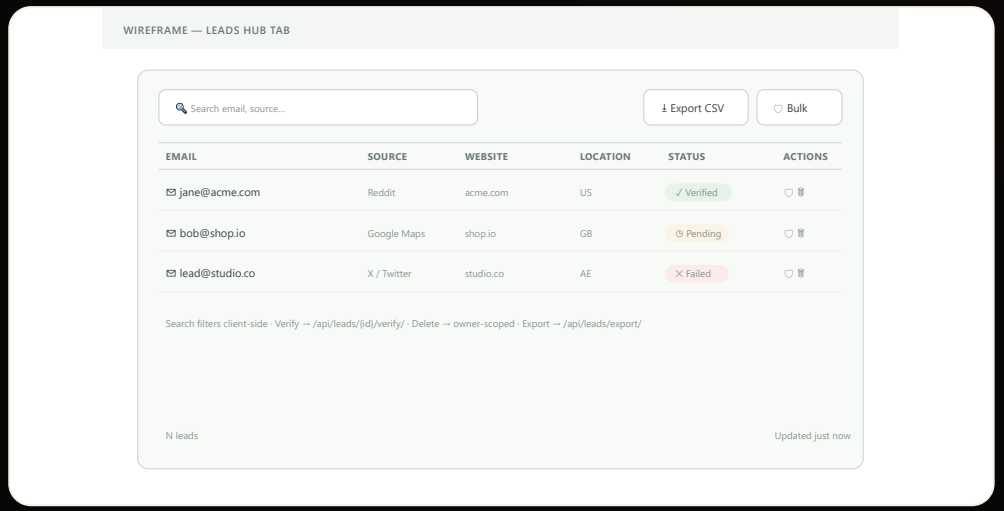

Dashboard · sidebar, tabs, stat row

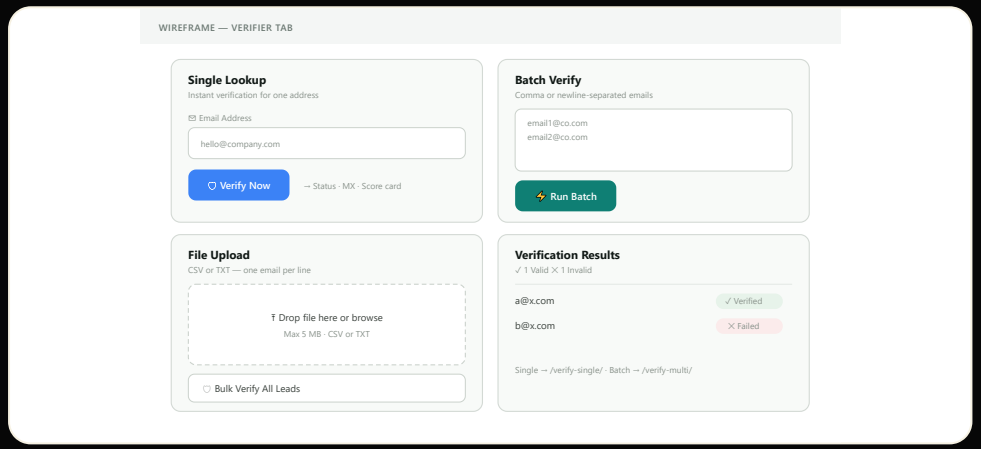

Generator · niche, country, platforms, Professional (Apify) mode

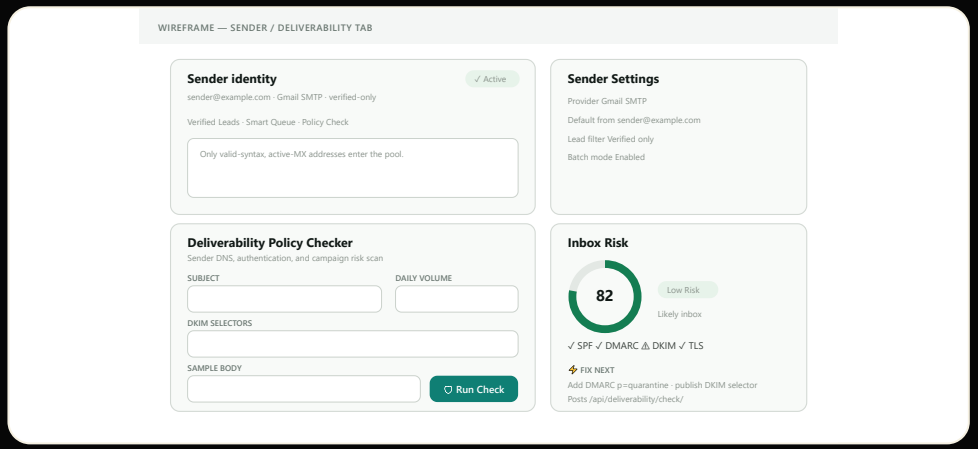

Wireframes: leads, verifier, sender

Leads Hub · search, verify, delete, CSV export

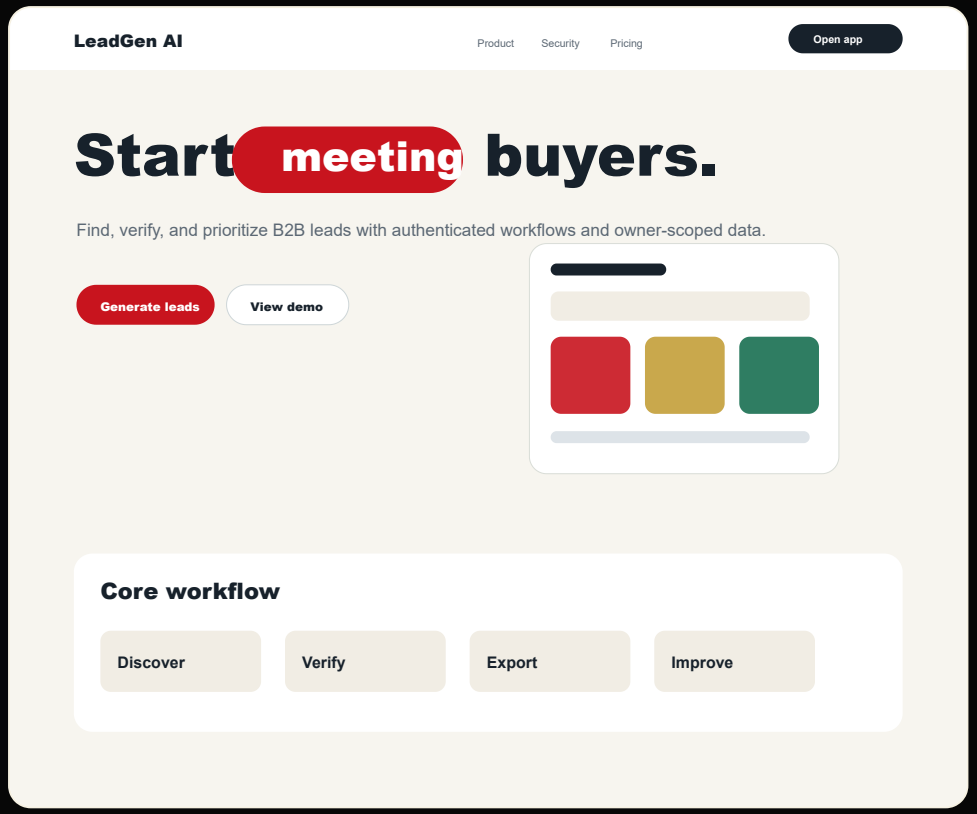

Verifier · single, batch paste, file upload, bulk audit

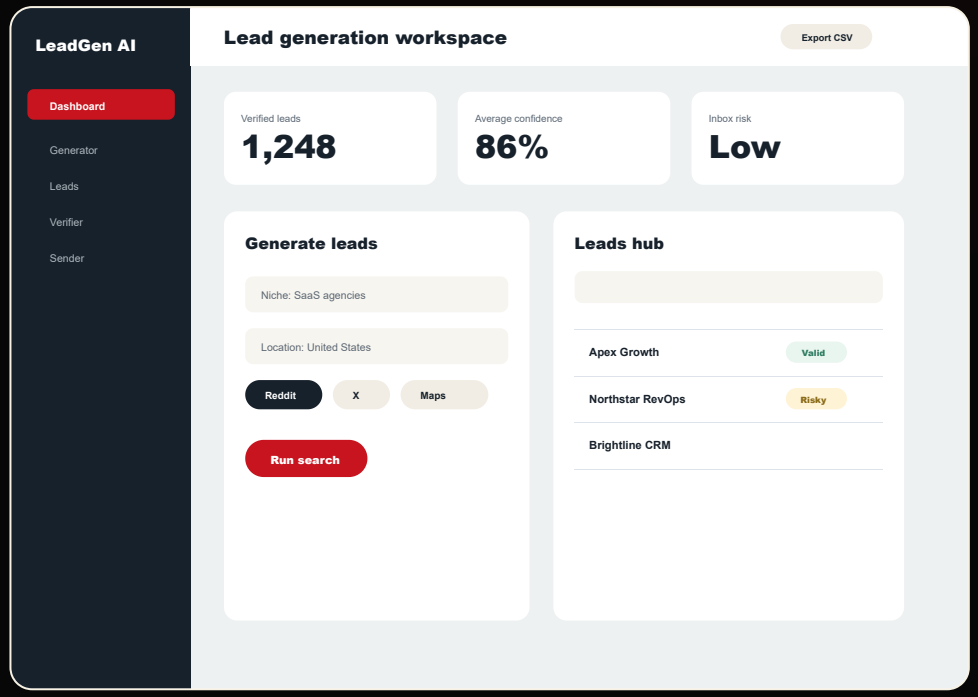

Sender · SPF/DMARC/DKIM/TLS inbox-risk score

High-fidelity screens

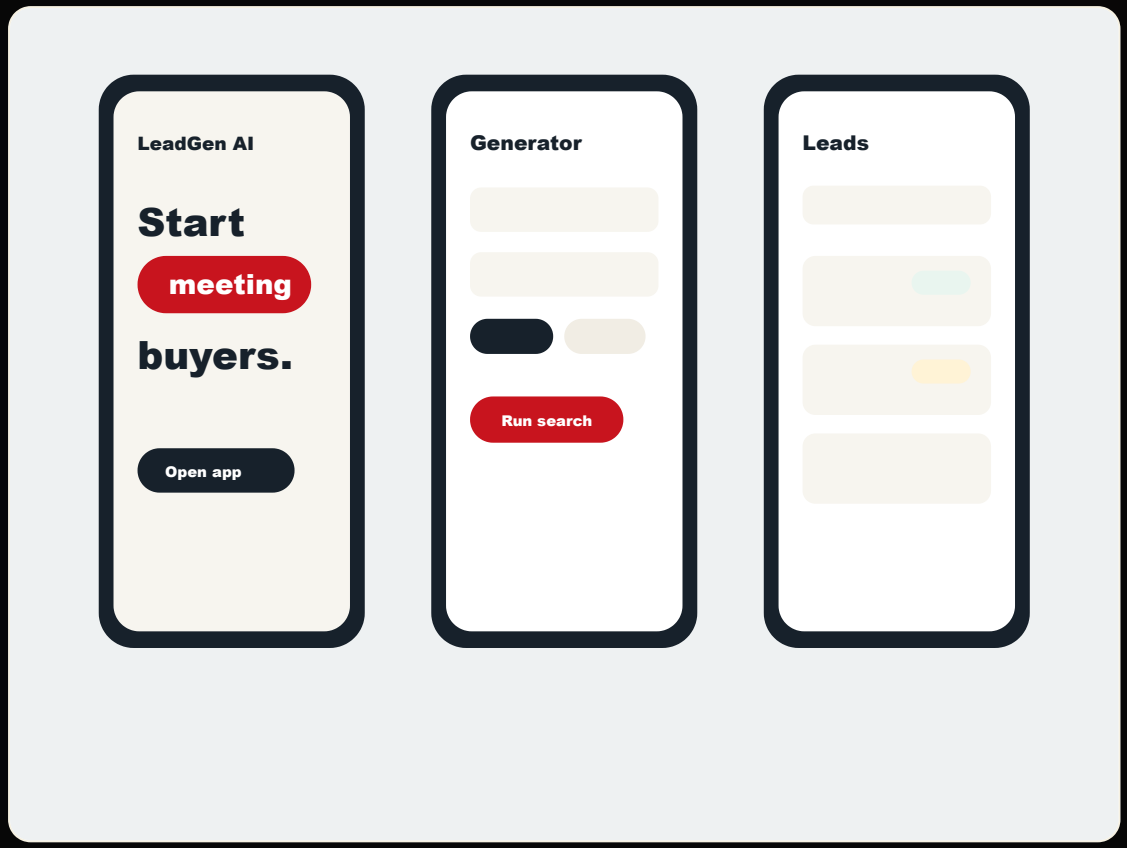

Landing page, desktop · 1440 wide

Application dashboard · 1440 × 1024

Mobile & prototype flow

Mobile flow: topbar navigation, stacked cards, compact buttons

PRIMARY USER JOURNEY

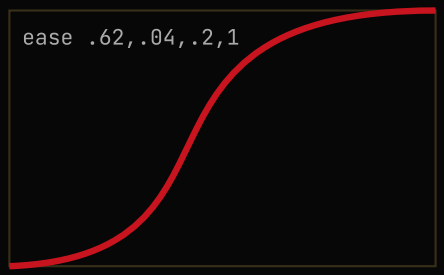

- 01 Landing
- 02 Google sign-in
- 03 Generate
- 04 Leads Hub
- 05 Verify
- 06 Deliverability
- 07 Export CSV

BREAKPOINTS

≥ 1280	sidebar + three-column content
768–1279	collapsible sidebar, two columns
< 768	mobile topbar, one column, compact CTAs

Motion system

Word interval	2600 ms	How long each hero word stays
Word transition	520 ms	Slide and fade between words
Card entrance	580 ms	Rise-in for cards and modals
Overlay fade	280 ms	Backdrop and modal fade
Easing	cubic-bezier(.62,.04,.2,1)	Shared ease for all of the above

KEYFRAMES

pulse / pdot live-status dots and ring

fadeIn · rise overlays and modals

cardEnter demo lead cards

mkin map markers and guide lines

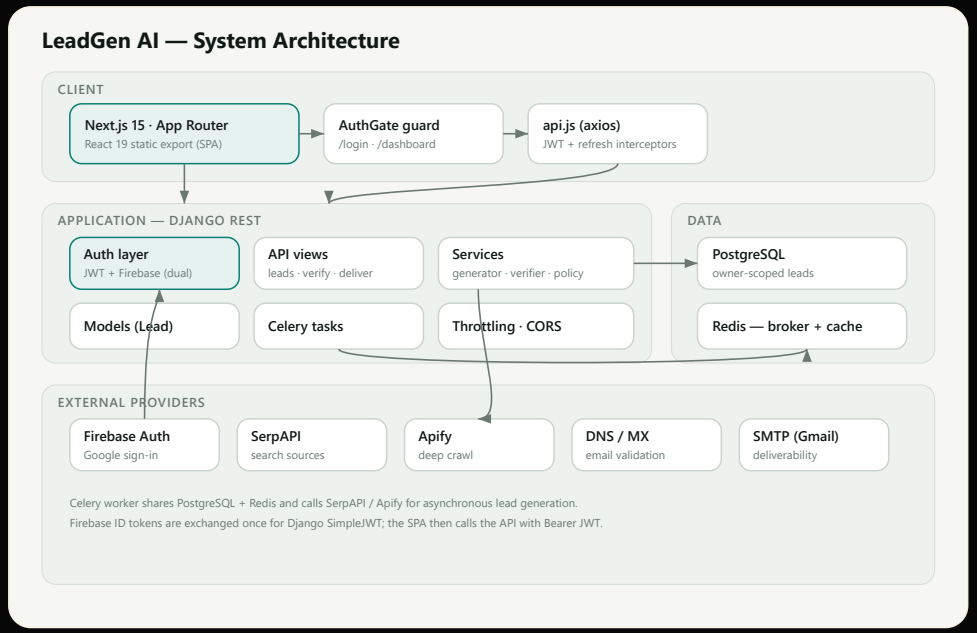

drop scroll hint

gerrPulse error banner alert

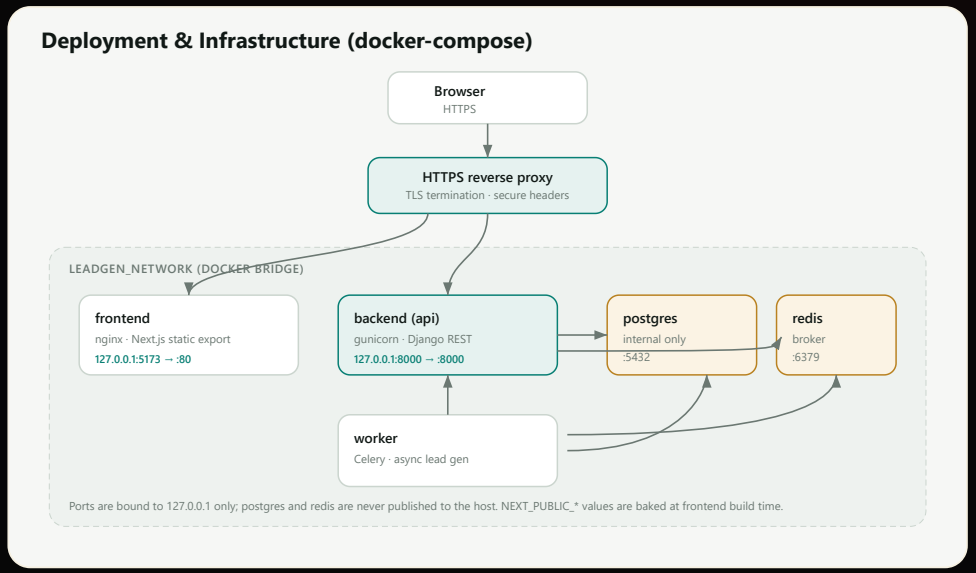

.reveal → .in section reveal on scroll

Reduced motion: when `prefers-reduced-motion` is set, word rotation stops and all durations shrink to near zero.

System architecture

Application · Next.js SPA → Django REST API → Celery/Redis → PostgreSQL; providers: SerpAPI, Reddit, X, Apify

Infrastructure · Docker Compose services; landing on Vercel

Stack & quality

TECHNOLOGY

Frontend	Next.js 15 · React 19 · Tailwind CSS
Backend	Django 5 · DRF · Celery
Auth	Firebase Google → SimpleJWT
Data	PostgreSQL · Redis
Sources	Reddit · X · Google Maps · Apify
Automation	n8n (scheduled + webhook)
Deploy	Docker Compose · Vercel
License	MIT

QUALITY GATES (CI ON GITHUB ACTIONS)

pytest
38 passed · 83.4%

pylint
10.00 / 10

vitest
87 passed · 88.4%

eslint
0 errors

next build
static export OK

SECURITY

Authenticated API, per-user and per-IP throttling, owner-scoped data, SSRF-guarded crawling, hardened production settings, weekly dependency and secret scans.

Delivery checklist

DELIVERED

- Brand identity and signature word pill
- Landing and application color systems
- Type system: 4 families with scale
- 21 vector icons with usage mapping
- Component inventory and state set
- 6 wireframes: all core screens
- High-fidelity desktop and mobile boards
- Motion tokens and reduced-motion rules
- Architecture and infrastructure diagrams
- Live deployment and MIT source code

WHERE THE SOURCE FILES LIVE
